Art Unit: 1775

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4,5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims include HVOF which is now excluded with the amendment to claim 1, which renders these claims indefinite.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anand et al (4,925,626) in view of VanNoy et al (6,884,205) and Browning (5,271,965).

Anand et al discloses the claimed tungsten carbide, cobalt chromium coating within the claimed grain size used as a wear protection coating, that can be deposited by ANY coating technique (column 2, line 66-67).

VanNoy et al discloses the use of these kinds of WC-CO coatings within the claimed thickness (column 4, line 65) that can be coated by HVOF technique (column 6, line 23-25).

Browning discloses that HVOF is superior to HVOF (column 2, line 18-22).

Thus it would have been obvious to one of ordinary skill in the art to provide the coating of Anand et al within the claimed thickness using the claimed process, as these thickness are known in the art to provide the known wear protection as shown by VanNoy et al, and by using the claimed method one would expect an improved performance as disclosed by Browning.

5. Applicant's arguments with respect to claims 1-5, 15 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
